

PROVIDER REFERRAL — 4 SIMPLE STEPS

Introduce the patient. Send the referral. We'll take it from there.

1 GIVE THE PATIENT THE TRIFOLD

They can take it home and reach us at oncobiomix.com. Patients can sign up but are not enrolled or charged until your referral is received — this lets us match them to you and answer their questions.

2 COMPLETE THE PROVIDER REFERRAL

Scan for the referral form. Complete it during the visit — a referral on file prevents delays if they decide later.

3 SEND THE REFERRAL TO ONCOBIOMIX

Fax the completed referral. We'll check whether the patient has already started in Healthie.

FAX
(210) 783-1079

4 WE HANDLE ONBOARDING

Already in Healthie, we match the referral. If not, we contact the patient and send the onboarding link.

IMPORTANT

Include the patient's email + phone. This lets our team reach them and get started without delay.

YOU MAINTAIN CONTROL

If an issue is brought to us, it is escalated to your staff in real time.

FOLLOW-UP YOU CAN CHART

Patient-reported outcomes

Symptom & adherence signals you may use in your notes.

Quality of life

Validated QoL metrics tracked across the journey.

THE RATIONALE, BY EVIDENCE

SHOWN TO · RCTs

Individualized nutrition counseling has improved quality of life and treatment tolerance in several cancer populations.

Ravasco et al.

LINKED TO · OBSERVATIONAL

Dietary pattern and fiber intake are associated with differences in recurrence and progression-free survival.

Meyerhardt; Spencer et al., Science 2021.

BEING STUDIED · PROSPECTIVE

Whether microbiome-guided nutrition improves these outcomes — our GLOW registry.

OncoBiomix Research, ongoing.

BUILT FOR ONCOLOGY SAFETY

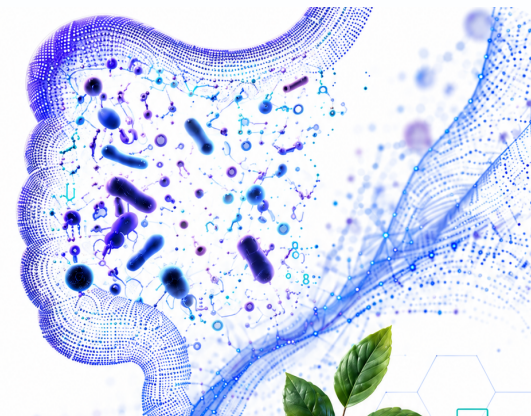

For patients on immune checkpoint inhibitors, our dietitians advise caution regarding certain probiotic supplements that may interact with therapy.

OncoBiomix is a general wellness product intended to support dietitian-guided nutrition. It is not intended to diagnose, treat, cure, or prevent any disease, is not a diagnostic test, and does not direct or replace oncology treatment decisions. Provider summaries are shared only with patient authorization.

ONCOBIOMIX

PHYSICIAN REFERRAL GUIDE

PRECISION ONCOLOGY NUTRITION

Provide **proactive** nutrition care for your patients.

At our core, OncoBiomix gives your patients access to oncology-trained registered dietitians. We use the gut microbiome to further hone their recommendations — so guidance is personalized, and proactive rather than reactive.

Rebiomix is the only microbiome-informed nutrition program built specifically for cancer care, pairing at-home gut analysis with oncology-trained dietitians to deliver precision nutrition that intends to support treatment tolerance, immune resilience, and patient well-being.

WHAT ONCOBIOMIX IS

Proactive precision nutrition — updating the tools of the oncology registered dietitian for care across the cancer journey.

1

Diet questionnaire
Habitual intake and dietary patterns.

+

2

Gut microbiome groups
One at-home sample, six gut groups.

● Biome Balanced

● Low Diversity

● Low SCFA Producer

● Overgrowth

● Barrier Impaired

● Inflammatory

+

3

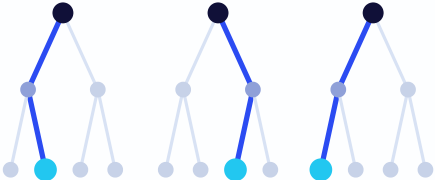

Oncology RD
Interprets results into the plan.

+

4

Food-first plan
Personalized nutrition, sent back to the provider.

PATIENT PERSONALIZATION

Every signal is weighed together — the plan reflects the whole picture, not one rule.

HOW IT WORKS

Simple. Human.

We combine what you eat with your microbiome to guide nutrition during cancer.

1 • ASSESS
Current diet survey.

2 • ANALYZE
Microbiome test + RebiomiX analysis.

3 • EXECUTE
Dietitian interprets both together.

4 • DELIVER
Nutrition plan + report to your doctor.

WHAT YOU GET AS THE PROVIDER

A provider cover sheet

Gut-microbiome category

Nutrition plan

WHAT THIS SOLVES FOR YOUR PRACTICE

- ✓ **Early, oncology-aware nutrition**
Specialized support most patients never receive — early, not after weight loss begins.
- ✓ **You stay in charge — and in the loop**
You remain the treating provider and receive summaries. Extending your care, not handing it off.
- ✓ **The microbiome in your practice, early**
An emerging precision tool without building a lab or interpreting data yourself.
- ✓ **Outcomes documented & sent back**
Quality of life and symptom tracking allows you to keep patients on track in their treatment and prevent unplanned healthcare visits.

WHAT HAPPENS AFTER YOU REFER

- 1 You refer**
Fax a signed referral — we handle everything after.
- 2 Patient enrolls & samples**
\$499 enrollment; completes the at-home microbiome kit and questionnaires.
- 3 Dietitian visit & summary**
Meets an oncology RD for the plan — a concise summary is sent back to you.
- 4 Ongoing support**
\$99/month for 1 year — follow-ups, recipes, and platform interactions.

COST TO THE PATIENT

\$499 enrollment — gut-microbiome kit, diet questionnaire, an initial 60-minute dietitian meeting, and one follow-up.

\$99/month for 1 year — continued communication, gut-group recipes, and wellness content during cancer.

Cash-pay, HSA/FSA-eligible, with no billing to your practice.

THE PROGRAM

Personalized plan, RD-reviewed
Gut-group recipes and treatment-aware guardrails, re-tested and adjusted over time.
